

MATAN REVACH

Technical Support Engineer

mrevach@gmail.com | (050)-791-4999 | linkedin.com/in/matan-revach | Holon, Israel

PROFESSIONAL SUMMARY

Technical Support Engineer with 5+ years of experience troubleshooting SaaS and cloud-based platforms, bridging users and engineering to resolve complex technical issues. Proven track record driving measurable impact — including a 30% reduction in recurring tickets through knowledge base development and a 25% improvement in high-priority incident resolution time. ISTQB certified, with strong grounding in incident management, root cause analysis, and API/data troubleshooting, and a track record of translating technical detail clearly for both engineers and customers.

WORK EXPERIENCE

Customer Support Lead — Proggio

June 2025 – June 2026

- Owned the SaaS support function end-to-end, managing 150+ monthly tickets across 50+ enterprise accounts in a cloud-based project management platform
- Built and maintained a knowledge base of 40+ articles and video tutorials, driving a 30% reduction in recurring tickets
- Partnered with R&D on incident management and the bug lifecycle, reducing resolution time for high-priority issues by 25%
- Maintained a 4.8/5.0 CSAT while surfacing customer feedback into the product feedback loop, contributing to ongoing UI/UX improvements

Customer Support Lead — Rapid Image

2021 – 2023

- Managed multi-channel support for 100+ SMB and enterprise clients across cloud and on-premise environments, handling complex software diagnostics and escalations
- Worked directly with clients to configure and tailor solutions to their operational needs
- Conducted deep-dive diagnostics and incident management on high-uptime systems, helping maintain 99.9% service availability

Senior Technical Support Lead — Dell

2020 – 2021

- Delivered advanced hardware and software troubleshooting for enterprise server environments supporting global clients
- Applied ITIL-aligned incident management practices to prioritize and resolve enterprise support cases
- Collaborated with global development teams to identify recurring technical issues and improve product performance across releases

Control Team Leader — Oshiland Mall

2017 – 2020

- Led and trained a team of 10+ operators in a 24/7 control center, overseeing security systems and real-time monitoring
- Coordinated incident response to critical events, ensuring full compliance with safety and operational protocols
